

# About Fishing Bait Launchers.com

---

Established in 2001 [Fishing Bait Launchers.com](http://Fishing Bait Launchers.com) has continued to provide handmade pneumatic Fishing Bait Launchers and bait cannons to North America, Canada and Europe.

We build custom Fishing Bait Launchers and bait cannons and kits for affiliate partners and corporate entities world wide.

We have provided pneumatic Fishing Bait Launchers and air cannons for the US Coast Guard, Swift Water Rescue, Extreme Sports and private corporations for over 10 years

[Fishing Bait Launchers](http://Fishing Bait Launchers), Bait Launchers, Bait Cannons, Combustion, Pneumatic... No matter what you call it, are great fun when used safely.

It's important to remember that bait cannons' are not toys and demand the same cautions and responsibilities as traditional firearms. Adult supervision during operation is the number one safety requirement in responsibly owning any type of potato cannon. If you are under 18, get an adult to help you. It is your responsibility to educate yourself before operating any type of fishing bait launcher.

## About Our Fishing Bait Launchers

Fishing Bait Launchers and Bait Cannons with plans for DIY how to build an affordable PVC Bait Launcher or Bait cannon.

How to make the frozen bait bullet to launch your bait using a bait launcher. This fishing bait launcher uses compressed air to launch the bait out while fishing in the surf or from a boat. Launcher uses a small vehicle air compressor with a 250psi rating. Comes with free set of molds.

### DESCRIPTION

This fishing bait launcher will cast your frozen bait bullet or puck approximately 150 to 300 yards depending on your Rod/Reel set up, bait size, and the bait cannon you choose.

The Bait Cannon is ideal for the Motor Home or Caravan, suitable for Rock or Beach casting and cheaper and easier than a Kontiki.

This fishing bait launcher - Bait Cannon is easy to use, simply pump up using an electric air compressor or stand up bike tire pump with a gauge (80 lbs TO 120LBS), drop in sinker with Trace and Bait , aim and squeeze the trigger. Compact design easy to store in the boot or caravan and only weighs 6lbs. The Bait Cannon is sold as a kit or pre built. We also have plans for those that like to tinker at home. These bait launchers are of high quality PVC/Stainless and Brass fittings (no rust) and pressure rated to 300 PSI.

THIS IS NOT A TOY. Proudly made in USA. They have an endless and inexpensive fuel source by filling them with air from a compressor or automobile tire inflator.

There are no flammable materials used to ignite the cannon, therefore eliminating chances of fire, explosions or burns.

These guns are perfect for launching bait pucks and bait bullets, potatoes, Tennis Balls, Golf Balls Confetti and Lemons. They are perfect for launching T-Shirts during a sporting event.

Because they don't need a flammable fuel for ignition, they are perfect for launching bait pucks and bait bullets, potatoes or vegetables in the forest or a field full of weeds and dry brush.

### Safety First

1. Make sure you know whether or not the gun is loaded. Treat the gun as if it is loaded at all times. In other words, do not point it at people or animals. Always point it in a safe direction when using or loading. Pay attention to the line traced by the potato gun's muzzle, make sure it doesn't cross anyone or anything you do not wish to shoot.

Fishing Bait Launchers can be dangerous, or even deadly when improperly handled. Never store or transport a loaded bait cannon. Don't load a potato gun unless you intend to shoot it immediately.

2. Do not put your finger on the firing mechanism unless the gun is pointed at the intended target. Simple: on target means on trigger, off target means off trigger.

3. Be sure of your target and what is beyond it. You must always launch bait in a safe location. This means NEVER point or fire at anything that (1) you cannot clearly and easily identify as a target, and (2) that would pose a danger to anyone were your ammo to stray, or ricochet. This means always knowing where your ammo has the potential to go. Never point the bait launcher at another person or boat or pull the trigger at a close-range target without a backstop that will STOP your fire.

4. A very important, but often overlooked rule, never hand a bait launcher to anyone who doesn't understand and abide by these rules. Once they are holding the bait launcher, it is their, not your, responsibility to handle it safely, but you will be putting your life and property as well as the life and property of everyone else on the line if you do so.

Do not use fishing bait launchers in extremely cold or extremely hot weather, PVC is a good material, but it does have its limits. PVC may become brittle in extreme temperatures.

Never go beyond 100 PSI with a PVC spud gun. **Be Safe! Have Fun!**

# Fishing Bait Launcher Kits

---

## MBC-15 Bait Launcher Kit: \$199.00

Below is a picture of the MBC-15 fishing bait launcher model kit. It comes unassembled with a pneumatic trigger. It has a detachable barrel measuring 32" x 1.5". This easy to handle bait cannon can shoot well over 150 yards on every shot with compressed air as the fuel. It features a sharpened barrel for easy loading of potatoes. It accepts the full line of M Series interchangeable barrels. See the barrel section for more choices. Cannons Kits are shipped unpainted. No special tools or parts are needed. **These Cannons are only available for shipping within Continental USA**

---

## MBC-20 Bait Launcher Kit: \$199.00

Below is a picture of the MGB-20 fishing bait launcher model kit. It comes unassembled with a pneumatic trigger ignition system. It has a detachable barrel measuring 32" x 2.0". This easy to handle fishing bait launcher can shoot well over 150 yards on every shot with compressed air as the fuel. It accepts the full line of M Series interchangeable barrels. See the barrel section for more choices. Cannons Kits are shipped unpainted. No special tools or parts are needed. **These Cannons are only available for shipping within Continental USA**

### **MBC-25 Heavy Duty Bait Launcher Kit: \$299.00**

Below is a picture of the MBC-25 Heavy Duty fishing bait launcher model. It comes with a pneumatic trigger. It has a fixed barrel measuring 32" x 2.5". This easy to handle Heavy Duty fishing bait launcher can shoot well over 300 yards on every shot with compressed air as the fuel. Cannons Kits are shipped unpainted. No special tools or parts are needed. **These Cannons are only available for shipping within Continental USA**
